

3M 9900 Static Control Anti-Fatigue Mat

Category : Other Engineering Material

Material Notes:

3M Static Control Anti-Fatigue Mats enable workers to stand comfortably for long periods while minimizing the fatigue associated with stand work. Manufacture from durable rubber, 3M Anti-Fatigue Mats consist of a matrix of hollow cylinders that function like a spring when compressed. These mats provide a durable cushion that offers secure, stable footing and a unique energizing responsiveness. Their structure provides a stable surface supported by rubber cells that soften in response to surface activity. These cells provide the most effective cushioning solution because the 3M Static Control Anti-Fatigue Mats get softer as compressed, not harder like products made of foam. Information provided by 3M

Physical Properties	Metric	English	Comments
Thickness	15900 microns	625 mil	

Mechanical Properties	Metric	English	Comments
Hardness, Shore A	42	42	
Coefficient of Friction	>= 1.0	>= 1.0	

Thermal Properties	Metric	English	Comments
Maximum Service Temperature, Air	82.0 °C	180 °F	
Minimum Service Temperature, Air	-40.0 °C	-40.0 °F	

Descriptive Properties	Value	Comments
Appearance	Black
