

3M SJ5202 Protective Product, Die Cut Shapes

Category : Other Engineering Material

Material Notes:

3M Bumpon Protective Products SJ5201 and SJ5202 are pressure-sensitive, adhesive backed polyurethane products made from SJ5200 Series soft foam rollstock. A hexagon shape is often preferred for various cushioning stop and non-skid foot applications. These products have a very high tack adhesive system (synthetic rubber, R-25), which has the capability of providing excellent adhesion to a wide variety of substrates. This includes many low surface energy substrates such as polypropylene, polyethylene, and powder coated paints. Information provided by 3M
