

A. Schulman POLYBLAK™ 4651SF Universal Black Color Concentrate, 50% Carbon Black in EVA

Category: Other Engineering Material, Additive/Filler for Polymer, Polymer, Thermoplastic, Ethylene Vinyl Acetate

Material Notes:

DescriptionPOLYBLAK® Black 4651SF is a universal black color concentrate containing 50% carbon based in EVA. This product is also produced without the use of stearates or any other lubricants. This masterbatch is designed to provide good opacity and a regular blue undertone with pigment particle size of 70 nanometers. POLYBLAK® Black 4651SF is formulated for use in injection molding and extrusion applications and is typically recommended for use at 5% addition levels. Information provided by A. Schulman.
