

## Abatron AboCrete Cement/Grout Resurfacing and Patching Epoxy

Category : Polymer , Thermoset , Epoxy

### Material Notes:

Cement/grout resurfacing and patching epoxy for industrial, marine, institutional, and residential uses. The ultimate restoration and resurfacing material structurally and chemically superior to concrete. Welds permanently to concrete, metal, wood, and most surfaces. AboCrete provides structural and decorative patching, resurfacing and restoration. It fills cracks and replaces missing sections of concrete, marble, granite, and other stones. It bonds broken sections together, anchors posts and railings. Hardens in approximately 1 to 6 hours depending on the temperature, thickness, amount of aggregate and other variables. It can be applied with simple hand tools or by brush, paint roller, or squeegee. Information provided by Abatron.
