

## Addcomp ADD-VANCE® SA 192 Slip Masterbatch, LDPE base

Category : Other Engineering Material , Additive/Filler for Polymer , Polymer , Thermoplastic , Polyethylene (PE) , LDPE

### Material Notes:

Fields of application: Improves slip properties of polyolefins. It can also be used as a release agent for injection molded products. Examples: (L)LDPE, HDPE, and PP films, sheets, profiles, injection molded products, etc. Mode of action and advantages: ADD-VANCE SA 192 provides excellent slip properties. ADD-VANCE SA 192 reduces friction between two surfaces for instance between polymer and metal. As a consequence the slip properties of the product are improved. Advantages: Highly effective, fast migration slip agent, already at low dosing rates; Injection molding: also improved demoulding and product release; Non-sticking pellets, dust free; and Safe and easy handling. Regulations: ADD-VANCE SA 192 is suitable for use in a wide range of plastics that come into contact with food. Information provided by ADDCOMP

Processing Properties	Metric	English	Comments
Processing Temperature	<= 250 °C	<= 482 °F	

Descriptive Properties	Value	Comments
Appearance	Translucent granules	
Dosing Level	0.01	as a mould
	0.75-2%
