

Asahi Glass Lumiflon LF-710F Solvent Soluble Fluoropolymer

Category : Polymer , Thermoplastic , Fluoropolymer

Material Notes:

Lumiflon was developed by Asahi Glass in 1982, and is unique being the first solvent soluble fluoropolymer. The FEVE based Lumiflon has a alternative copolymer. The complete inter-changeability between the Fluoroethylene and Alkyl Vinyl Ether gives excellent weathering and a high chemical resistance. LF-710F is used in electrostatic coating. It makes a coating that will be resistant to both weather and chemicals. Information provided by Asahi Glass Company, Inc.
