

BASF Palatinol® 9P Di nonyl Phthalate

Category : Other Engineering Material , Additive/Filler for Polymer

Material Notes:

Formula: C₂₆H₄₂O₄Description: Palatinol® 9P plasticizer is a linear phthalate ester based on a predominantly linear C₉ alcohol. Palatinol 9P is designed to meet today's more demanding requirements of vinyl in automotive and wire and cable industriesApplications: Palatinol 9P is an ideal plasticizer for use in automotive interior trim and electrical applications. Because of its low volatility, flexible vinyl products made with Palatinol 9P exhibit excellent fogging characteristics. Its linearity offers improved low temperature properties and ease of processability when compared to branched phthalate plasticizers.Information provided by BASF
