

Beijing Evergrow Resources TBH-30 Glass Fiber Tissue

Category : Ceramic , Glass , Glass Fiber

Material Notes:

Features:Lightness, heat resisting, low thermal capacity and low thermal conductivity, soft and excellent fire-isolation. Anti-heat energy and heat stability.Anti-mildew, anti-insect, un-scattered and good stretching resistance.Excellent anti-ageing.Excellent sound absorbability, adsorption and filtering.It can be cut, sewn according to requirements and it's also easy to construct.Application:These products are widely used for wrapping material of all kinds of heat source (coal, electricity, oil, and gas) and heat-presentation of central air-conditioning pipelines.It can be used as the materials for heat-isolation and fire-resistance.It can be used as the materials for seal, sound absorption filtering and insulation.Excellent material for heat-conducting, heat-presentation.It can be used as materials for sound isolation, heat insulation and heat-resistance.It can also be used for touching fire and all kinds of flue in which the temperature is less than 600°CInformation provided by Beijing Evergrow Resources.

Descriptive Properties	Value	Comments
Efficiency (%)	85	filter
Initial Resistance (Pa)	50	
Precision (micron)	60	
Tensile Strength at Yield (N/m)	55000	radial
	55000	latitudinal
Width (mm)	600, 1000
