

## Borealis Borstar® HE3474-LS Blue HDPE Compound for The Coextrusion of Identifying Stripes On Black HD Pipe for Drinking Water

Category : Polymer , Thermoplastic , Polyethylene (PE) , HDPE , High Density Polyethylene (HDPE), Pipe Grade

### Material Notes:

Borstar HE3474-LS is a bimodal, high density polyethylene compound designed for coextrusion of blue identifying stripes. It is fully stabilized against thermal degradation and the die build-up during the extrusion is minimized. Furthermore, it has a highly covered pigment that gives a bright blue stripe even when extruded as a thin layer on a black pipe. It also contains UV-stabilizer to ensure excellent weathering resistance. Borstar HE3474-LS is recommended for identifying stripes of black pipes for drinking water produced from Borstar HE3470-LS. Information provided by the Manufacturer.
