

## BorsodChem ONGROVIL S-5064 Suspension PVC-Resin

Category : Polymer , Thermoplastic , Vinyl (PVC) , PVC, Uncompounded

### Material Notes:

S-5064 is a suspension type PVC homopolymer of medium molecular mass. It is characterized by a porous particle structure, a narrow range of particle size and a relatively high apparent density. It retains its excellent pourability even after compounding. Field of application: Ongrovil S-5064 is primarily suitable for rigid applications. It is recommended for extruded or calendered films and sheets as well as for injection molding or production of hollow articles. Information provided by BorsodChem Rt.
