

CIMBAR UltraMag & UltraMag ST 3 Magnesium Hydroxide Powder

Category: Other Engineering Material, Additive/Filler for Polymer

Material Notes:

UltraMag is a naturally ground, white, high-purity Magnesium Hydroxide suitable for a wide range of applications including water treatment slurries, plastics, rubber and flame-retardant/smoke suppressants. It has low corrosiveness and is non-toxic. UltraMag is a cost effective alternative to Hydrated Aluminas and precipitated Magnesium Hydroxide. Its higher initial decomposition temperature is 340°C, versus 230°C for ATH, which allows for use under higher processing temperature situations. UltraMag ST is a stearate-treated version of this material.Information provided by Cimbar Performance Minerals.
