

## Chesterton 346 Descaler & Chemical Cleaner

Category : Fluid

### Material Notes:

**Description:** Chesterton® 346 Descaler & Chemical Cleaner is a concentrated, acid-based liquid cleaner formulated with a metal protecting inhibitor. It is specifically designed for removing inorganic soils and coatings such as hard water deposits and rusts in a wide range of applications. Simply by changing the dilution, the product can be used in areas ranging from the boiler room to the warehouse floor and on surfaces from concrete to metal. At dilution of 4 to 1, 346 Descaler & Chemical Cleaner can efficiently etch concrete surfaces to provide maximum adhesion of Chesterton® 411 Urethane Enamel or other paints, Similar dilutions will quickly clean rust or algae stained concrete buildings, pavements, patios, structures etc. The product quickly removes cement build-up from construction equipment, trucks, pouring forms, structural steel, and tools. Unlike other acid-based cleaners, the product will not aggressively attack base concrete or metal surfaces nor any adjacent metal work. Rather, its high quality formulation contains a selective metal protecting acid inhibitor, so it protects these surfaces from attack.

**Features:** Concentrated, fast acting  
**Dilutable** up to 4 to 1  
**Proprietary inhibitor package** prevents attack on metals  
**Nonflammable**  
**Biodegradable**  
**Detergents** and wetting agents enhance cleaning action  
**NSF A3-Registration number** 133962  
**Benefits:** Cost effective and versatile  
**Lowers product inventory costs**  
**Saves labor, maintenance costs**  
**Stops losses due to chemically damaged metals**  
**Saves power, greater fuel efficiency**  
**Applications:** Etches concrete before priming and painting walls and floors; cleans stains, rust and algae from concrete build-up, lime scale and corrosion in boilers, air conditioner and refrigeration units, condensers, and circulating systems; cleans scale from cloth finishing rollers and similar equipment in textile mills.
