

Chesterton 706 FG Rustsalvo®

Category : Fluid , Lubricant

Material Notes:

Description: Chesterton® 706 FG Rustsolvo is a high quality, fast acting, penetrating oil which reaches deeply in and frees frozen nuts, bolts, and fittings without injury to the base metal. Due to its excellent capillary action, 706 FG Rustsolvo will reach inaccessible places other penetrates will not touch. Breakaway torque is significantly reduced as the product penetrates every bit of rust, scale or corrosion and loosens tar, grease, dirt and deposits of carbon and graphite. Most penetrating oils on the market today are designed for multiple function-displacing moisture, protecting against corrosion, lubricating and finally, loosening rusted bolts. The result is a compromise product. Unlike these other products which claim to be all things to all users, 706 FG Rustsolvo was formulated to provide only one function; that of the best possible penetration. Use Chesterton 706 FG Rustsolvo when a true penetrating oil is needed. **Features:**Singular FunctionPin-point Jet SprayExtremely Low Surface Tension 706 FG: NSF H2 – Registration number 134005706 FG – Convorms to FDA Standard 21 CFR 172.884, 178.3620, 178.3650**Benefits:**No compromise – Best possible penetrationCreeps into microscopic spacesCan be used in federally inspected meat and poultry plantsDirected exactly at needed spots**Applications:** Use on plumbing, machinery, trucks, pipe lines, railroads, tractors, steam and gas fittings, valves pumps, drilling utilities, auto shops, and ships. Use anywhere rust, tar, grease and dirt deposits on nuts and bolts prevent easy removal**Information provided by Chesterton**
