

## Chesterton 715 Spraflex® Lubricant

Category : Fluid , Lubricant

**Material Notes:**

Description: Chesterton® 715 Spraflex is a surface lubricant for chain drives, open gears and wire rope. It provides an elastic retractable film which cushions and lubricates load bearing surfaces. The product resists extrusion by bonding a "wear shield" to metals protecting surfaces even under the extreme pressures which squeeze typical greases and oils out. 715 Spraflex is water resistant and regular applications of the product provides a barrier which guards against rust and corrosion. It is a long lasting lubricant for machinery and equipment exposed to the weather or indoors to moisture and industrial fumes. Features: Self Adhering Lubricant Water Resistant Resistant to Acid Fumes Resists Extrusion NSF H2 - Registration number 133938 (bulk) and 133934 (aerosol). Information provided by Chesterton
