

ChevronTexaco LS Heating Fuel 2

Category : Fluid , Lubricant

Material Notes:

Chevron LS Heating Fuel 2 is a medium-bodied distillate fuel manufactured from selected crudes. It meets the requirements of ASTM D 396, Standard Specification for Fuel Oils, for a No.2 heating fuel with a sulfur content of 0.05 mass % maximum (500 ppm) – a "low sulfur" fuel. Chevron LS Heating Fuel 2 has good storage life, high heat content, and is seasonally blended to avoid cold flow problems. Rigorous attention is also paid to fuel cleanliness. Applications Chevron LS Heating Fuel 2 is applicable for domestic or commercial warm-air furnaces, water heaters, restaurant and galley ranges, commercial hot-air driers, and orchard heaters requiring a No.2 heating fuel
