

ChevronTexaco ParaMount™ ELV Paraffinic Process Oil

Category : Fluid , Lubricant

Material Notes:

Features Chevron ParaMount ELV Paraffinic Process Oil offers all the advantages of a bright stock including low weight loss and excellent solubility. ELV is exceptional because of its very light color. Applications ParaMount ELV Paraffinic Process Oil functions as a processing aid or as an extender oil in rubber compounding. ELV is used to: Reduce the amount of time required for mixing Reduce the amount of heat generated in mixing Maximizes the dispersion of components Extend product volume Reduce product cost while maintaining the physical properties of the rubber compound ParaMount ELV Paraffinic Process Oil is ideal for use in compounding a wide variety of finished rubber products, including: Tires Coatings Rubber Membranes Weather Stripping Automotive Interior Moldings Automotive Under hood parts
