

ChevronTexaco Superla® DCO

Category : Fluid , Lubricant , White Mineral Oil (WMO)

Material Notes:

FeaturesChevron Superla DCO is a highly refined food grade white mineral oil that exceeds FDA purity requirements for the dedusting of grains intended for human consumption. Chevron Superla DCO contains vitamin E, a natural antioxidant, to protect quality during handling and storage. **Applications**Chevron Superla DCO can be used to control dust on animal feeds, chemicals, and fertilizers. Food grade white mineral oils are widely used for dust control by the grain industry. White oil is applied to the grain just before or during active grain tumbling to prevent dust from escaping the grain stream. For best results, the oil should be applied before the grain enters the storage bin. Only food grade oils that meet the tough standards of the U.S. Food and Drug Administration (FDA) may be used for this application. Chevron Superla DCO does not promote grain rancidity. Chevron Superla DCO is a field-proven products, fully authorized by the FDA for grain dedusting – at concentrations up to 200 ppm on the grain or rice.
