

ChevronTexaco Type F Automatic Transmission Fluid

Category : Fluid , Lubricant

Material Notes:

General Description Type F is specifically designed for all pre-1977 Ford vehicles and some makes between 1977 and 1981. Effective March 1997, Ford discontinued administration of approvals for Type F fluids. However, there are still many vehicles on the road that use Type F. Type F and MERCON fluids are not interchangeable. Chevron ATF Type F is a high friction ATF for older Fords that specifically call for a Type F fluid. Applications Chevron ATF type F is recommended for automatic transmissions in Ford, Mercury, and Lincoln Passenger cars and light trucks manufactured by Ford Motor Company and certain other makes prior to 1977, and some makes from 1977 to 1981 (consult vehicle owners manual) This fluid is not to be used in Ford transmissions that require a fluid meeting Ford M2C138-CJ. Chevron Automatic Transmission Fluid DEXRON®-III/MERCON® is the recommended in this case. Chevron ATF type F meets the requirements of former Ford specification M2C33-F
