

Colorite Polymers 9812-15 Radiopaque Vinyl Compound

Category: Polymer, Thermoplastic, Vinyl (PVC), PVC, Molded

Material Notes:

Description: Colorite radiopaque compounds are available in a variety of hardness and opacifier type. These compounds are designed for use as radiopaque striping or to be extruded into catheter tubing. Radiopacity is obtained through the incorporation of either barium sulphate or bismuth subcarbonate in a non-toxic vinyl base. Complete traceability of all components are maintained to comply with GMP requirements for medical applications. Information provided by Colorite Polymers.
