DayGlo Phantom IPO-19 Invisible Pigment, Blue<br>Category: Other Engineering Material , Additive/Filler for Polymer , Polymer

## Material Notes:

These materials have a yellowish or white color body under visible light and produce a bright vibrant color when exposed to an Ultra-Violet light source. Phantom pigments can be used for security and tracing functions where a non-visible color is warranted.Applications:General Applications: Phantom pigments are available in five basic colors and can be used in a wide range of applications such as rotogravure and intaglio printing, plastics and coatings to name a few. These materials have excellent temperature stability and solvent resistance.

Phantom pigments can be also mixed with each other to create additional color phenomenon.Plastic Applications: Phantom pigments have excellent heat stability. They can withstand temperatures above $550^{\circ} \mathrm{F}$ making them excellent candidates for use in plastic resins.Graphic Arts and Coatings Applications: Because of Phantom pigments excellent solvent resistance, they can be used in a number of inks and coatings. An initial pigment concentration of $5 \%$ to $10 \%$ is recommended but may need to go up to $25 \%$ based on film thickness.
