

Dow Corning 949 CATIONIC EMULSION

Category : Fluid , Polymer , Thermoset , Silicone

Material Notes:

DOW CORNING 949 Cationic Emulsion is a 35% cationic emulsion of an amine-functional silicone polymer. The amodimethicone actives are delivered in an opaque, lowviscosity liquid with a neutral pH. It contains a non-tallow derived quaternary-amine surfactant and does not contain alkylphenol ethoxylate (APE) emulsifiers. This emulsion was developed as a conditioning additive for hair care products such as shampoos, conditioners, styling aids and hair colorants. This product provides easy formulation and good dilution stability. Information provided by Dow Corning
