

Dow Corning TM-4012 DISPERSION

Category: Other Engineering Material, Additive/Filler for Polymer

Material Notes:

Dow Corning® TM-4012 Dispersion is specifically designed as a topical treatment for tissue softening in order to provide soft handle while maintaining the typical tissue water absorbency characteristics. Specific applications include facial, handkerchief and bath tissue, produced from virgin as well as recycled fibers. Particularly suited for use on tissues that include a high percentage of recycled paper, Dow Corning® TM-4012 Dispersion will significantly improve the handle with marginal variations of the physical performances of the paper. Dow Corning® TM-4012 Dispersion is intentionally formulated with non-reactive components to minimize problems in application equipment, e.g., gel formation, stickies, plugging of spray nozzles or engraved rolls. Information provided by Dow Corning

Physical Properties	Metric	English	Comments
Specific Gravity	1.00 g/cc	1.00 g/cc	
	@Temperature 25.0 °C	@Temperature 77.0 °F	
Solids Content	30 %	30 %	
рН	4.5 - 8.0	4.5 - 8.0	
Kinematic Viscosity	30 cSt	30 cSt	

Processing Properties	Metric	English	Comments
Shelf Life	12.0 Month	12.0 Month	

Descriptive Properties	Value	Comments
Appearance	hazy	
Hydrophilic	yes
