

E-Polymers EFLEX® V1150 EPDM/TPV

Category : Polymer , Thermoplastic , Elastomer, TPE , Thermoplastic Vulcanizate Elastomer (TPV)

Material Notes:

V-series (Thermoplastic Vulcanizate Resins): E-FLEX V series resins are a family of thermoplastic elastomers which exhibit rubber-like properties and are processable on conventional thermoplastic equipment. E-FLEX V series resins are based on EPDM/PP or SEBS/SEEPS/PP(PE) utilizing new reactive grade polyolefins exhibiting high value/cost performance. It shows low temperature toughness, chemical resistance, ozone and UV resistant and wide service temperature range from -55 to 120°C for airbag covers, air dams, license plate holders and interior, as well as weather strip and exterior trim applications in automobile industry, for gasket in construction and appliance industry. Information Provided by E-Polymers Co., Ltd.
