

Eagle Brass 1008 Low Carbon Steel, 1/4 Hardened

Category : Metal , Ferrous Metal , Carbon Steel , Low Carbon Steel

Material Notes:

1008 is a standard grade Carbon Steel. This alloy is generally used for "commercial quality" cold rolled steel. It is an economical, general purpose steel grade offering moderate strength and toughness. As a standard grade, 1008 steel is used in many common, low-stress applications. Weldability and brazeability are excellent. Typical uses include infrared counter measure flare substrate, electronic parts carrier, low ohm etched heating element and conductor grid elements.
