

Eagle Brass 521 Phosphor Bronzes 8% C, Extra Spring

Category : Metal , Nonferrous Metal , Copper Alloy , Bronze

Material Notes:

Alloy C521 is a high tin alloy of the phosphor bronze family. The additional tin relative to the more commonly used C510 results in higher mechanical properties with a modest reduction in electrical conductivity. Applications include electronic parts, springs, contacts, switch parts and fasteners. Information provided by Eagle Brass Company
