

## ExxonMobil Vistalon™ 7602 Ethylene Propylene Diene Terpolymer Rubber

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE)

### Material Notes:

Vistalon 7602 EPDM rubber is a high ENB polymer with low ethylene and medium Mooney. It has broad molecular weight distribution for excellent compounding processibility. It is applicable for extruded applications like weatherseals and glazing seals that need fast cure rate and good compression set. It may also be used in molded applications requiring fast cure rates. Key Features: Excellent processibility resulting in shorter mixing and molding times. Good low temperature properties. Good low temperature flexibility and compression set. Fast cure rate and high cure state. Availability: Africa & Middle East, Europe, North America, Asia Pacific, Latin America and South America. Information provided by ExxonMobil Chemical
