

Fibre Glast 69 Methyl Ethyl Ketone Peroxide (MEKP)

Category : Fluid , Solvent

Material Notes:

#69 MEKP - Phthalate free MEKP offers the greatest flexibility in terms of useful concentration range and pot-life, thus funds use in a wide variety of ambient temperature cure applications. Used by most UPR (unsaturated polyester resin) producers for resin stabilization because of its consistent lot-to-lot catalytic activity. Low residual hydrogen peroxide content makes DDM-9 ideal for use in gel coats. Information provided by Fibre Glast Developments Corporation.
