

## **Gwent Electronic Materials C2010903D2 Curable Silver Range**

Category: Fluid, Other Engineering Material, Additive/Filler for Polymer

## **Material Notes:**

This product is based on a unique curing process that results in the low temperature formation of a thermosetting conductive adhesive that combines good adhesion with excellent electrical properties. It offers the advantage of a One-Pak cure system combined with the convenience of Ambient Temperature stability, which means they do not have to be stored in a freezer or refrigerator. Application: Stencil or Screen PrintableInformation provided by Gwent Electronic Materials Ltd.
