

Henkel Turco 5668 Paint Remover

Category : Fluid , Solvent

Material Notes:

Turco 5668 is a diphase, liquid paint remover developed to remove resistant coatings, such as aluminized silicones, polyurethanes, acrylics, epoxies and chromated primers without using phenols, chromate, chlorinated solvents or acids. Turco 5668 is ideal for the removal of PRC-1560M and PRC-1560MC coatings, and is not detrimental to aircraft metals such as aluminum, titanium, magnesium, cadmium, conversion coatings, Dow coatings or ferrous alloys. Turco 5668 is supplied with a built-in, non-aqueous chemical seal which retards evaporation and helps minimize drag out losses.
