

Henkel Turco Mil Etch Etchant

Category : Fluid , Solvent

Material Notes:

Turco Mil Etch is a granular alkaline product formulated to produce a fine satin or frosted etch on aluminum and its alloys. The working solution develops a low level foam blanket to prevent caustic mist from escaping into the workplace. It provides outstanding sequestering action, which prevents build-up of scale and sludge on tank walls and heating coils. These benefits eliminate the need for expensive descaling of the tank and the heating coils, and assure efficient heating of the etch bath. Applications: Alkaline Etch Conversion Coatings Boric Sulfuric Anodizing Chromic Acid Anodizing
