

Henkel Turco Nova EC-202L Etchant

Category : Fluid , Solvent

Material Notes:

Turco Nova EC-202L is a liquid alkaline aluminum etch cleaner for immersion applications that will produce a lightly etched finish on aluminum alloys, while simultaneously removing any oils and other soils present on the work surface. Produces a stable foam blanket which effectively entraps the gases evolved during the etching operation. Contains a special blend of detergents and dispersing agents to minimize hard scale formation and, therefore, makes equipment maintenance a much easier and less costly operation. Applications: Alkaline Etch Conversion Coatings Boric Sulfuric Anodizing Chromic Acid Anodizing
