

Imerys Minsparâ, ¢ 10 Ground Feldspar

Category: Ceramic, Clay, Feldspar Clay

Material Notes:

Minsparâ,¢ 10 is a fine particle size, ground Feldspar with a tightly controlled particle size distribution. Minsparâ,¢ 10 is easily dispersed to a high Hegman grind to produce coatings finishes with high gloss and sheen. The combination of low 325 mesh residue, mean particle size, and exterior durability make Minsparâ,¢ 10 an excellent mineral additive for thin film coating and adhesive applications, interior and exterior paints and coatings and powder coatings systems.
