

## Imerys Minsparâ„ç 7 Ground Feldspar

Category : Ceramic , Clay , Feldspar Clay

**Material Notes:**

Minsparâ„ç 7 is a fine particle size, ground Feldspar with a tightly controlled particle size distribution. Minsparâ„ç 7 is easily dispersed to a high Hegman grind to produce coatings with high gloss and sheen. The combination of low 325 mesh residue, particle size, and exterior durability make Minsparâ„ç 7 an excellent mineral additive for interior and exterior non-flat coatings, adhesives, sealants and caulk compounds. Information provided by Imerys
