

Indium Corp. In₂(SO₄)₃ Indium Sulfate Anhydrous

Category : Ceramic

Material Notes:

Indium Sulfate is a grayish-white powder. It is hygroscopic and possesses a monoclinic prism structure. It is available as an anhydrous powder, a hydrated salt with 9 moles of associated water, and a solution in varying concentrations up to its solubility limit in water. Indium Sulfate is used as a synthesis chemical and as a hardening agent in gold electroplating baths. Properties Chemical Formula: In₂(SO₄)₃ General Description: Grayish white hygroscopic powder; monoclinic prisms Purity Grades Available: 4N (99.99%), 5N (99.999%) Uses Chemical synthesis Hardening agent in gold electroplating baths Information provided by the manufacturer, Indium Corporation of America.
