

KKPC KOSYN KSL 210 Styrene-Butadiene Latex

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE)

Material Notes:

Styrene-Butadiene Latex Characteristics: KOSYN KSL 200 series are carboxy metamorphic styrene-butadiene latex. The KSL 200 series has good blending stability with various additives used in paper processing. It is designed to show its best function where the solid content is high, speed is severe, and latex is rich. It can be used for rod, air knife, or blade coater, and it has excellent stability and printing aptitude. **Applications:** Binder for paper coating (art paper, coated paper, LWC paper, coated paper board, CCP, etc) This product is so sensitive to sunlight and humidity that it can be tarnished and caused deterioration of quality if exposed. It is recommended to store it in cool and shady area lest it should be exposed to direct sunlight. Do not expose to incompatible materials or contaminants. Data provided by Korea Kumho Petrochemical Co., Ltd.
