

## LG Chemical CP-WB Polycarboxylic Copolymer

Category : Other Engineering Material

### Material Notes:

Description: CP-WB is the main raw material for concrete admixture, which improves water reducing and slump retention abilities. CP-WB was developed through our advanced synthetic technologies, imparting good workability in the concrete. Advantage: High water reducing ability (low W/C); Good workability (Less slump loss); Economical concrete design  
Main Uses: Water reducer & retention
