

MarkeTech Silicon Single Crystal Semiconductor Wafer, n-type, Arsenic Doped, Czochralski-LED Grown

Category : Ceramic , Other Engineering Material , Semiconductor

Material Notes:

Data provided by the supplier, MarkeTech International. MarkeTech International supplies standard silicon single crystals grown with diameters from 51 to 150 mm from polycrystal material with donor concentrations corresponding to a resistivity of 300 ohm cm. Standard "p type" silicon boules are doped with boron and "n type" are doped with phosphorus, antimony or arsenic with oxygen content controlled to 6 - 9 atoms/cm³. Standard orientation: ,
