

## Master Bond UV10LV One Component, Low Viscosity UV Curable Adhesive

Category : Polymer , Adhesive , Thermoset

**Material Notes:**

Master Bond UV10LV is a one part UV type system for bonding, sealing and coating that features good optical clarity and physical properties as well as low viscosity. This combination of properties allows it to be readily used in applications where spin coating is required. UV10LV cures readily in 20-30 seconds when exposed to a UV light source emitting at a wavelength of 320-365 nm .
