

Master Bond X17 Elastomer Based One Component Adhesive and Primer

Category : Polymer , Adhesive , Thermoset , Epoxy

Material Notes:

Master Bond Polymer System X17 is a specially formulated one component adhesive especially designed for bonding polyolefins such as polypropylene, polyethylene as well as their many co-polymers and blends. This synthetic elastomer based adhesive compound exhibits a unique balance of both shear and peel properties when bonding polyolefin substrates to each other, as well as to related substrates including flexible PVC. Master Bond Polymer System X17 is a readily flowable clear liquid. It can be further thinned with ketone and aromatic solvents.
