

Michelman® CleanGrip® 2100 Silica based, sprayable nonskid coating

Category: Ceramic, Oxide, Silicon Oxide, Fluid

Material Notes:

Description: Water based frictionizing agentUsage: CleanGrip® 2100 is a silica based, sprayable nonskid coating designed to reduce the slipperiness of shipping containers by providing excellent slide angles. Because CleanGrip® 2100 is easily cleanable, it takes the worry and mess out of running non-skids. This product is gluable using both hot melt and cold set adhesives. Application data: CleanGrip® 2100 is designed to be applied by spray coater; however, other application methods (such as felts, sponges or rollers) are also possible. Frequently applied at the paper mill, typical uses include: Corrugated packaging for non-perishables; Folding cartons and Multiwall bagsFood Contact Information when manufactured in the USA and Belgium: FDA: 176.170: Components of paper and paperboard in contact with aqueous and fatty foods. 176.180: Components of paper and paperboard in contact with dry foods. Information provided by Michelman®
