

Mitsui ADMER® QF551A PP Type Polyolefin

Category : Polymer , Thermoplastic , Polyolefin , Polypropylene (PP)

Material Notes:

ADMER® Adhesive Resin is a modified polyolefin with functional groups, designed to bond to a variety of polyolefins, ionomers, polyamides, ethylene vinyl alcohol (EVOH), polyesters (PET), polycarbonates, polystyrenes and metals such as steel and aluminum. ADMER serves as a tie-layer in unique multi-layer structures to combine properties of different materials, such as gas barrier resins and moisture barrier resins. Available in pellet form, ADMER can be used in a wide variety of coextrusion processes for bottles, tubes, sheets and films. ADMER, a thermoplastic, can be processed easily by: coextrusion blow molding tube coextrusion sheet coextrusion film coextrusion (cast and blown film) coextrusion coating powder coating (metal coating) co-injection ADMER complies with 21 CFR 175, 105. PP based ADMER complies with 21 CFR section 177, 1390, (C) (2) under certain conditions. Information provided by Mitsui Chemicals America, Inc.
