

PCP-Canada BUS PLATE® AA1370-50 Cast Precision Sawed Blocks/Plates

Category : Metal , Nonferrous Metal , Aluminum Alloy , Aluminum Casting Alloy

Material Notes:

BUS PLATE® was developed from 5000 series precision cast plate (alloy 5083). It is fabricated from heat treated prime cast ingots. This product is characterized by an excellent dimensional stability after machining, a very good weldability and a very high thermal and electrical conductivity. This product is especially suitable for electrical applications. It is used in bus bar manufacturing for the transport and the distribution of energy. PCP Canada developed this product to meet complex electrical requirements to minimize energy losses at the lowest possible cost. This product is available in a wide variety of sizes. Information provided by PCP-Canada.
