

Parker Chomerics Duralan II™ P Polycarbonate Unshielded Window

Category : Polymer , Thermoplastic , Polycarbonate (PC) , Polycarbonate, Optical Grade

Material Notes:

Description: Parker Chomerics display windows and filters are available in various plastic materials, including polycarbonate. A unique feature of Parker Chomerics window products is the capability to laminate together multiple substrates allowing for a fully customized design. This process allows for the incorporation of specialty materials for EMI shielding, light control, polarization and other value added features. The use of polycarbonate or acrylic offers the most flexibility in application design. Surface Finish Option: Clear, Semi-gloss and Matte Hardcoat Design Options: Screen Printing, Heat Shielding, Privacy Filters and Other Specific Applications Available Typical Applications: Military, Aerospace, Medical, Industrial, Display Protection and Test Instrumentation Information provided by Chomerics
