

Permabond 910 Cyanoacrylate, Methyl grade

Category : Polymer , Thermoset , Acrylic/Cyanoacrylate Adhesive

Material Notes:

PERMABOND® 910 is the original 100%-methyl cyanoacrylate adhesive. It is a single part, low viscosity liquid that will cure rapidly at room temperature when pressed into a thin film between parts. PERMABOND® 910 will cure to a fixture strength in 10 seconds on most surfaces and strength develops rapidly. The adhesive was designed specifically for the bonding of metal surfaces, and provides excellent bond strength to steel, aluminum and most metal surfaces. The methyl cyanoacrylate will also adhere well to a wide variety of other materials including most plastics and rubbers. Features & Benefits: Excellent adhesion to metal surfaces Fast cure Easy to apply and dispense No mixing required Information provided by Permabond.
