

## Plansee DENSIMET® D188 Tungsten-Nickel-Iron Alloy

Category : Metal , Metal Matrix Composite , Nonferrous Metal , Refractory Metal , Tungsten Alloy

### Material Notes:

Characteristics: Easy processing High density Precision forming and machining High ductility High strength 100 % impermeable Typical

Applications: Balancing weights in motors and drive components Vibration dampers in motors and drive components Collimator and shielding components for X-ray and gamma radiation protection Aviation and aerospace: propeller and helicopter blades Sports equipment: golf clubs Optical industry: microscopes and measuring instruments Information provided by Plansee.

Physical Properties	Metric	English	Comments
Specific Gravity	18.8 g/cc	18.8 g/cc	

Component Elements Properties	Metric	English	Comments
Fe + Ni	1.5 %	1.5 %	
Tungsten, W	98.5 %	98.5 %	

Descriptive Properties	Value	Comments
Ductility	much greater than pure W	
Fineness of Grain	greater than pure W	
Machinability/Workability	much greater than pure W
