

Plastcom SLOVALEN PH 49 GF 25 PP, 25% glass fibre, mod. of mech. properties

Category: Polymer, Thermoplastic, Polypropylene (PP), Polypropylene with 30% Glass Fiber Filler

Material Notes:

FeaturesModified homopolymer PP for injection moulding, chemically reinforced with 25 % glass fibre, contains the modifier of mechanical properties. Increased strength in comparison with unfilled PP. Applied in all industry branches. Increased strength, toughness, modulus in tension due to the modification. Delivered in natural and in the full RAL colour scale. Moderately increased toughness and lower MFI in comparison with PH 69 GF 30. Packaging, transport, stocking The product is packed in hermetically closed thick-walled 25 kg PE bags, on a 1.000 kg palette coated in a stretch foil, in big bags with a thick PE foil fixed on a 1.000 kg palette, in paper octabins with a thick PE foil fixed on a 1.000 kg palette or in other packaging according to customer requirements. The transport is provided in closed-up vehicles where the material is protected against movement and mechanical damage. The product requires stocking in closed-up, dry places protected against sun and thermal radiation. Information Provided by Plastcom spol. s r.o.
