

## Polimeri Europa Dutral® CO 058 Ethylene - Propylene

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE)

### Material Notes:

Dutral® CO 058 is an Ethylene - Propylene polymer produced by suspension polymerization using a Ziegler-Natta Catalyst. A non-staining antioxidant is added during the production process. Key Features: Dutral® elastomers are characterized by excellent resistance to ageing and weathering, good resistance to both high and low temperatures, low permanent set values, good resistance to a large number of chemicals. Dutral® CO 058 is an amorphous copolymer of medium-high molecular weight. Articles based on Dutral® CO 058 are characterized by superior cold flexibility. Main Applications: Appliances, polymer modification, oil viscosity modifier. Information provided by Polimeri Europa.
