

Polimeri Europa Dutral® PM 8273 Ethylene - Propylene Masterbatch

Category : Polymer

Material Notes:

Dutral® PM 8273 is a masterbatch based on Ethylene - Propylene elastomer produced by suspension polymerization using a Ziegler-Natta Catalyst. A non-staining antioxidant is added during the production process. Key Features: Dutral® elastomers are characterized by excellent resistance to ageing and weathering, good resistance to both high and low temperatures, low permanent set values, good resistance to a large number of chemicals. Dutral® PM 8273 is a masterbatch suitable for polyolefin modification, especially medium flow PP (MFI (230°C/2.16kg) = 10-20 g/10 mins). Main Applications: Polymer modification. Information provided by Polimeri Europa.
