

Polimeri Europa Dutral® TER 6148 Ethylene - Propylene - Diene Terpolymer

Category : Polymer , Thermoset , Rubber or Thermoset Elastomer (TSE)

Material Notes:

Dutral® TER 6148 is an Ethylene - Propylene - Diene polymer produced by suspension polymerization using a Ziegler-Natta Catalyst. A non-staining antioxidant is added during the production process. Key Features: Dutral® elastomers are characterized by excellent resistance to ageing and weathering, good resistance to both high and low temperatures, low permanent set values, good resistance to a large number of chemicals. Dutral® TER 6148 is an amorphous high molecular weight terpolymer of medium-high diene content, extended with 15% paraffinic oil. It is characterized by very good loading capacity and improved mixing processability, especially in medium and highly plasticized compounds. Dutral® TER 6148 based compounds present excellent low temperature performance, fast extrusion rate, fast curing, good shape stability and mechanical properties. Main Applications: Automotive, mechanical goods, building, appliances. Information provided by Polimeri Europa.
