

PolyChem Alloy PolyShield KC1

Category : Polymer

Material Notes:

PolyShield products are available as conductive polypropylene, polystyrene, and polyethylene for films and extrusion. These products were designed for static shielding and corrosion protection of E/e applications, such as semiconductors and electronics components packaging. Typical usage levels range from 50%-100% depending upon the degree of protection desired and the extent of corrosion agents in the environment of the application. PolyShield products are available in a uniform pelletized shape.
